

Contents

- Introduction** 1
- 1. Overview of Wine Making** 3
- 2. Composition and Quality of Grapes and Wine** 4
- 3. Making Red Table Wines** 7
 - Crushing and stemming
 - Adding sulfur dioxide
 - Adding pure wine yeast starter cultures
 - Alcoholic fermentation
 - Pressing
 - Malolactic fermentation
 - Completing alcoholic fermentation
 - Racking
 - Aging and topping
 - Bottling
 - Making rosé or pink table wines
- 4. Making White Table Wines** 18
 - Crushing, stemming, and pressing
 - Adding sulfur dioxide, settling, adding yeast, and fermentation
 - Racking, topping, aging, and bottling
- 5. Potential Spoilage and Stability Problems** 22
 - Acetification and oxidation
 - Hydrogen sulfide (H₂S)
 - Cloudiness and deposits
 - Other clarifying and fining agents
 - Wine filtration
- 6. Analyzing Juice and Wine** 25
 - Wine acidity and pH
 - Keeping records
 - Soluble solids (°Brix)
 - Reducing sugar
 - Titrateable acidity
 - Total and free sulfur dioxide
 - Malic acid
- 7. Evaluating Wine Quality** 30
- 8. The Wine Making Facility** 32
 - The processing work area
 - The wine aging and storage areas
 - Equipment and supplies
 - Cleaning and sanitizing
 - Cleaning and maintaining of wooden cooperage
- Afterword** 37
- Helpful Sources and Information** 38
 - Selected references
 - Sources of equipment and supplies for home wine making
 - Additional sources of information and assistance
 - Federal regulations pertinent to home wine making
- Glossary** 42
