

As I mentioned in a previous email, we will not be transferring any of our currently rented compressed gas cylinders to the RMI. Instead, these cylinders will need to be returned to the Wickson Hall cages and new ones will need to be ordered to be delivered to the RMI cages. I will confirm that we can order the new ones a few weeks in advance so that they will be ready and waiting for us when we arrive.

Viticulture and Enology currently has 75 cylinders rented. Most of those are being used in Wickson Hall and the Enology Building. Most were delivered in 2007 and 2008. However, some have been around much longer. The one that we have had the longest was delivered on 5/20/1999. That's a lot of demurrage fees!

I can print out a list of currently rented cylinders by PI or by account. Please ask me if you would like one and please start returning those cylinders!

Thanks,
Cary
